

RESEARCH POLICY

The IRDEIC **research programmes** benefit from the flexibility of collective and individual research, thus giving coherence to the overall policy.

The rationale and effectiveness of the IRDEIC rests on a balance between the individual congruity of the institute's four research teams that supervise a particular programme, and the overall synergy linking them all to work on the programmes and eight identified topics

The important research conducted at the institute is attested by the **scientific events, thesis defences, publications** and, in particular, the release in November 2014 of the long-awaited Volume 1 of the Grands arrêts de la Cour de justice (Major Decisions of the Court of Justice) published by Union Dalloz.
