

INTRODUCTION TO RESEARCH PROGRAMMES

At Toulouse 1 Capitole University, the IRDEIC represents a research centre that encompasses all legal research fields beyond the national level (international, European and comparative). The institute also has a multi-disciplinary dimension as it draws from a balanced pool of public and private law lawyers (as such dichotomy makes little sense in real-world issues). The IRDEIC continues to invest in the research fields it has acquired expertise in or where such research could still be expanded or diversified.

PROGRAMME FIELDS

European law on health and medications
Since its creation, the IRDEIC has worked on the Sésame and Sésame2 programmes

Administrative European law
The CODAE programme opened up the field and prospects which are used within the STRUDAE programme.

Public international law
The RASDIP programme in cooperation with Quebec's Laval University.

RESEARCH PROGRAMMES IN PROGRESS

PRAGUE joint programme

'Amphis de l'Europe' programme

RASDIP joint programme: Interaction of legal systems in public international law

TVA programme: Tax harmonisation in Europe through case-law
